# Executive Summary

**This latest Industry Intelligence Service (IIS) Report, 19th edition, provides broker and industry performance and demographic data for the six-month period of April 2024 to September 2024, as well as data from recent quarterly periods. This report draws on data supplied by nine of the industry's leading aggregators.**

Mortgage brokers continued to be the preferred channel of choice for home buyers with mortgage broker market share topping 74.6% as of the September 2024 quarter, the largest mortgage broker market share observed at that point.

In the 12 months leading up to September 2024, brokers settled \$378.87 billion in home buyer loans. This represents the highest value of new home loans settled over a 12-month period to this point. It is the second time settlements have surpassed \$370 billion in a 12-month period since the establishment of the IIS Report.

Between April 2024 and September 2024, mortgage brokers settled \$203.80 billion in residential home loans – a 16.25% increase year-on-year, and the highest overall value to date. The average value of loans settled per broker for the six months to September 2024 increased to \$9.15 million, a 13.6% increase on the previous six-month period. Period-on-period growth in the value of loans settled was experienced across all states.

The average value of home loans settled (per active broker) increased from \$10.01 million to \$10.36 million year-on-year, a rise of 3.5%.

The broker population continues to increase, reaching 22,265 brokers – the highest number to date. In the April to September 2024 period, broker numbers rose by 2,393, or 12% year-on-year. In the five years to September 2024, the broker population has grown by 34%.

The total number of home loan applications lodged between April and September 2024 grew by 34,900, or 9.88% compared period-on-period, and 7.7% year-on-year. The average number of applications lodged by active brokers increased from 17.6 to 19.1 period-on-period.

The major banks' share of broker-originated lending fell 1.4 percentage points in the July to September 2024 quarter to under 40% (39.9%). Conversion rates fell for the fourth consecutive period since October 2022. Year-on-year, conversion rates from application to settlement dropped two percentage points, but only 0.2 percentage points period-on-period.

Year-on-year, the number of mortgage brokers also writing commercial loans increased 24.21% to a record high of 7,023 brokers. It was a 3.97% rise compared to the previous period.

The value of commercial loans settled by mortgage brokers reached its highest value ever of \$22.68 billion, up \$5.39 billion, or 31.20%, compared year-on-year.

Year-on-year the total number of female brokers has risen 5.61% to 3,746. For the six months to September 2024, there was a negligible change in the number of female brokers.

The MFAA's Industry Intelligence Service (IIS) Report, now in its 19th edition, has been a cornerstone resource for MFAA members and the broader mortgage and finance broking industry over the past 10 years. As part of our ongoing commitment to delivering valuable and relevant insights, the MFAA is undertaking a review of the IIS Report to enhance its content and ensure it continues to meet the evolving needs of our industry. In line with this review, the 19th edition excludes remuneration information, as we continue to focus on refining the report's scope and addressing emerging industry priorities. This approach reflects our dedication to providing the most impactful and actionable intelligence for our members.

Broker market share reached 74.6% as of the September 2024 quarter, the highest mortgage broker market share observed at that point.

## Value of home loans settled by brokers, per six-month period (\$)

Mortgage brokers settled \$203.80 billion in residential home loans for the six-month period from April 2024 to September 2024.

This figure represents the highest recorded value for the April to September period and the highest value overall to date.

When compared period-on-period, new loan settlements increased by \$26.28 billion, or 14.80%. The year-on-year figure represents an increase of \$28.48 billion, or 16.25%.

**The last twelve-month period has seen a 16.25% increase in home loan settlements for the mortgage broking sector.**

## Value of new home loans settled by brokers, per year (\$) 12 months to end of September 2024

Source: MFAA Quarterly Survey

Note: IIS 18th edition compares the value of home loans settled by brokers for the year-ending periods up to 31 March 2024; this edition compares year-ending periods up to 30 September 2024.

In the twelve months leading up to September 2024, brokers settled \$378.87 billion in home loans. This amount represents the highest value of new home loans settled over a 12-month period to date, and it marks the second time that settlements have surpassed \$370 billion.

When compared year-on-year, the result represents growth of \$28.24 billion, or 8.06%.

# MFAA's quarterly survey of brokers and aggregators

## Market share of new residential home loans settled by mortgage brokers as % of ABS Housing Finance Commitments/Lending to Households

Note: The quarterly survey draws on data from the major aggregators.

Mortgage broker market share of all new residential home loan settlements reached 74.6% in the September 2024 quarter. This is the largest mortgage broker market share observed to that point.

Compared year-on-year, mortgage broker market share increased by 3.1 percentage points in the September quarter.

**Mortgage broker market share reached 74.6% in the September 2024 quarter, the highest result observed at that point.**

## Value (\$) of home loans settled by mortgage brokers

Note: The quarterly survey draws on data from the major aggregators.

The value of home loans settled by mortgage brokers grew between the April 2024 and the September 2024 quarters.

During the September 2024 quarter, mortgage brokers settled \$103.23 billion in home loans. This was the highest result for a September quarter on record, and noted a 9.5% increase compared to the September 2023 quarter.

## Average value of new home loans settled per state (\$) and number of applications lodged per active broker from 1 April 2024 to 30 September 2024

Nationally, the number of applications lodged per active broker has declined from 20.1 in the six months to September 2023 to 19.1 in the current period.

However, the average value of home loans settled increased from \$10.015 million to \$10.368 million over the same period, an increase of 3.5%.

## Total value (\$) of broker loan books, per state

Note: Data for the Northern Territory and Tasmania has been excluded from this analysis due to the scale of the Y-axis labelling.

As of September 2024, New South Wales and the ACT lead the market with a broker loan book total value of \$394.33 billion, accounting for 36.98% of the national total. This reflects a year-on-year increase of \$34.57 billion, or 9.61%.

Victoria has the second largest loan book with a portfolio of \$304.37 billion, representing 28.54% of the market, and has grown by \$26.05 billion; or 9.36% over the past year.

Queensland's portfolio has increased by \$17.75 billion; or 10.87% to \$181.12 billion.

Western Australia has a portfolio of \$115.43 billion with a growth of 5.35%, while South Australia has shown a year-on-year increase of 10.4% (\$6.17 billion), bringing its total to \$65.55 billion.

## % Change in the value of broker loan books, from April 2024 to September 2024, and total value of the broker loan book by state

At a national level, the total value of broker loan books grew to \$1,066.30 billion, a 9.30% increase year-on-year.

**At a national level, the aggregate value of broker home loan books grew by 9.30% year-on-year to September 2024.**

## National average value of home loans settled per broker

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

The average value of loans settled per broker for the six months to September 2024 increased by \$1,095,679, or 13.60%, to \$9,153,285.

When compared year-on-year, the average value of new home loans settled per broker grew by \$330,995, or 3.75%.

## Average value of home loans settled per mortgage broker in each state

Note: Datasets at the state level do not always reconcile exactly to national figures. This is because of slight variations in some aggregators' data extracts at the state level. This is not a material cause for concern.

The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

Period-on-period, the average value of home loans settled per broker grew across all states.

New South Wales and ACT increased by \$1,248,238, or 14.34%, to \$9.95 million. Over the same period, in Victoria the average value of loans settled per broker grew by \$528,385, or 6.80%, to \$8.30 million.

Queensland experienced significant growth of \$1,610,049; or 20.50% to \$9.46 million.

South Australia increased by \$943,811, or 11.89%. Western Australia grew by \$1,393,398, or 19.53%.

Tasmania recorded the highest growth at \$2,375,898, or 46.12%. Northern Territory recorded a significant increase of \$1,280,243, or 39.49%, from its smaller base.

## Number of loan applications lodged by state and nationally

| Number of new home loan applications | Apr20-Sep20 | Oct20-Mar21 | Apr21-Sep21 | Oct21-Mar22 | Apr22-Sep22 | Oct22-Mar23 | Apr23-Sep23 | Oct23-Mar24 | Apr24-Sep24 |
|--------------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| NSW & ACT                            | 92,989      | 99,090      | 118,961     | 114,316     | 107,620     | 109,332     | 121,099     | 117,705     | 130,672     |
| VIC                                  | 90,065      | 99,177      | 110,716     | 109,388     | 108,688     | 99,631      | 99,358      | 93,430      | 99,632      |

| TAS                                  | 3,903       | 3,447       | 1,261       | 1,452       | 1,684       | 1,838       | 1,722       | 1,562       | 1,696       |
| NT                                   | 873         | 858         | 371         | 433         | 303         | 300         | 374         | 335         | 358         |
| Total number of applications         | 333,830     | 363,819     | 410,227     | 395,410     | 382,523     | 343,524     | 360,316     | 353,184     | 388,084     |
| Total number of brokers              | 16,490      | 16,968      | 18,285      | 18,585      | 19,236      | 19,456      | 19,872      | 22,031      | 22,265      |

Note: Seven aggregators provide data for loan applications at the state level, so sub-totals for the states do not reconcile to the overall total.

The total number of home loan applications lodged between April and September 2024 grew by 34,900, or 9.88%, compared period-on-period.

## Number of home loan applications by state

Note: Data for the Northern Territory and Tasmania has been excluded from this analysis due to the scale of the Y-axis labelling.

All states recorded growth in the number of home loan applications lodged when compared period-on-period.

New South Wales & ACT grew by 12,967 or 11% to 130,672 and Victoria grew by 6,202, or 6.6%, to 99,632.

## Average number of home loan applications lodged per broker vs average number of home loan applications lodged per active broker, April 2024 to September 2024

| Number of applications                           | Apr20-Sep20 | Oct20-Mar21 | Apr21-Sep21 | Oct21-Mar22 | Apr22-Sep22 | Oct22-Mar23 | Apr23-Sep23 | Oct23-Mar24 | Apr24-Sep24 |
|--------------------------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Average number of applications lodged per broker | 20.2        | 21.4        | 22.4        | 21.3        | 19.9        | 17.7        | 18.1        | 16.0        | 17.4        |

Note: Inactive brokers – those who did not lodge a new loan application for the six-month period – represent 15.21% of the total broker population. Therefore, it was important to account for inactive brokers to better illustrate the average rates of productivity for the majority of brokers.

At a national level, comparing the April to September 2024 period to the previous 12 months, the average number of applications lodged per active broker declined from 20.1 to 19.1. When inactive brokers are included, the average number of applications lodged declined from 18.1 to 17.4.

Period-on-period, the average number of applications lodged by active brokers increased from 17.6 to 19.1, and from 16.0 to 17.4 if inactive brokers are included.

## Conversion rates by brokers

Note: The conversion rate is calculated based on the number of home loans settled as a proportion of the number of home loan applications lodged. Conversion rates need to be interpreted with caution as some aggregators may count conditional approvals rather than applications.

Conversion rates recorded a fourth consecutive period of decline since September 2022.

Compared year-on-year, conversion rates from application to settlement reduced by two percentage points, while period-on-period conversion rates declined by 0.2 percentage points.

**The conversion rate of home loan applications to settlements declined for the fourth consecutive period to 76.1%.**

## Change in the value of home loans settled, year-on-year April 2024 to September 2024

Year-on-year, the value of home loans settled grew by 16.2% from \$175.31 billion to \$203.79 billion.

Northern Territory showed a decline in the value of loans settled throughout the period of 6%.

**The value of loans settled increased by 16.2% year-on-year.**

## Change in the number of brokers by state vs. change in the value of home loans settled by state, year-on-year April 2024 to September 2024

Overlaying the growth in broker numbers against the growth in new loan settlements, year-on-year broker numbers at a national level have increased by 12.0%.

The value of new home loans settled recorded a positive 16.2% growth for April 2024 to September 2024.

## Share of national value of home loans settled (%) vs. share of total brokers deployed in each state (%), April 2024 to September 2024

New South Wales and ACT, and Victoria continue to have the largest shares of lending.

New South Wales, ACT, and Queensland show a higher proportion of value of new loans settled compared to their proportion of broker population. New South Wales and ACT's share of settlements increased by 0.8 percentage points, from 39.7% to 40.5%, and the share of brokers remained flat at 37.2%.

Victoria's share of settlements fell by two percentage points to 27.2%, whilst the share of brokers in the state grew 0.4 percentage points to 30.0%.

The other states also recorded mild variations year-on-year.

## Value of home loans settled during the period, by state (\$)

Year-on-year, broker home loan settlements increased by \$28.48 billion, or 16.25%, overall.

New South Wales and ACT experienced a \$12.86 billion, or 18.5%, increase while the value of loans settled in Victoria and Queensland grew by 8.4% and 21.0%, respectively.

New South Wales, ACT and Victoria continue to dominate in terms of the largest share of the home loan settlements at a combined 67.7%.

# Average value of the residential home loan book per broker per state; and in total, April 2024 to September 2024

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.s.

The national average value of brokers' loan books has decreased 2.4% year-on-year, from \$49.09 million to \$47.89 million.

**The average value of a broker's loan book decreased by 2.4% year-on-year.**

## Broker population, in total for the sampled aggregators

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

The April 2024 – September 2024 period saw continued growth in the broker population with an increase of 2,393 brokers, or 12.0%, compared year-on-year.

At 22,265, this is the highest total for the broker population observed to date.

**The broker population surpassed 20,000 for the second time in the period April 2024 to September 2024.**

## Broker population by state, and population change between reporting periods

Continued over the page.

Note: Data sets for the number of brokers at a state level do not always reconcile to national figures. This is because of slight variations in some aggregators' data extracts at the state level. This is not a material cause for concern.

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

The broker population grew across all states except in Tasmania and Northern Territory where it decreased. Compared to the previous six-month period, broker population growth was strongest in SA at 4.9%.

## Proportion of broker population by state

Note: Data sets for the number of brokers at a state level do not always reconcile exactly to national figures. This is because of slight variations in some aggregators' data extracts at the state level. This is not a material cause for concern.

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

Period-on-period, New South Wales and ACT's share of the broker population declined 0.1 percentage points to 37.2%.

Victoria's proportion of the broker population grew by 0.1 percentage point to 30.0% of the total broker population.

Queensland declined slightly by 0.1% to 16.1% and Western Australia remained stable at 10%.

## Number of people per mortgage broker compared with the population based on ABS Estimated Resident Population, June 2024

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

The national average number of Australians per mortgage broker has declined year-on-year from 1,322 to 1,211 – a decrease of 111 people or 8.39%.

At the state level, Victoria continues to have the highest concentration of brokers per capita at 1,045, followed closely by New South Wales and ACT at 1,081 and by Western Australia at 1,336.

The Northern Territory continues to have the lowest saturation of brokers, with 8,503 Australians per broker, followed by Tasmania at 5,586.

**There is now one mortgage broker per 1,211 people in Australia.**

## Share of brokers that settled home loans in aggregate in the following value bands, April 2024 to September 2024

Note: The figures in this analysis are a representative sample of the industry.

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

During the April 2024 – September 2024 period, 2,610 brokers did not settle a home loan which equated to 15% of the broker population.

This ratio remained flat in the same period last year.

If inactive brokers were excluded and the data recalculated for their exclusion, 30.7% of brokers wrote \$3 million in home loans or less, 43.1% of brokers wrote \$5 million in home loans or less, 33.1% of brokers wrote \$5 million to \$15 million, and 23.9% wrote more than \$15 million in the six-month period.

**Inactive brokers represent 15% of the broker population.**

## Number and proportion of female brokers in the industry

Note: The number of aggregators providing gender specific data fell from nine aggregators for IIS 8 to eight aggregators for IIS 9, 10 and 11, to seven aggregators from IIS 13 onwards and to four aggregators since aggregators merged from IIS 17 onwards

The total number of female brokers remained stable during April 2024 to September 2024.

Period-on-period, the total number of female brokers was slightly down by three.

Year-on-year, there was an increase of 199 female brokers, up 5.61%.

The number of female brokers in the industry grew by 199 and the proportion increased by 0.2 percentage points year-on-year, to 26.8%.

**The number of female brokers remained stable compared to the last period.**

## Number and proportion of brokers recruited per period, by gender

|                                         | Apr19-Sep19 | Oct19-Mar20 | Apr20-Sep20 | Oct20-Mar21 | Apr21-Sep21 | Oct21-Mar22 | Apr22-Sep22 | Oct22-Mar23 | Apr23-Sep23 | Oct23-Mar24 | Apr24-Sep24 |
|-----------------------------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Number of men recruited during period   | 630         | 665         | 992         | 973         | 1,096       | 839         | 928         | 900         | 1,134       | 994         | 1,122       |
| % of men recruited during period        | 69%         | 71%         | 71%         | 70%         | 70%         | 68%         | 65%         | 66%         | 66%         | 68%         | 68%         |
| Number of women recruited during period | 281         | 268         | 412         | 420         | 480         | 387         | 491         | 456         | 572         | 475         | 535         |
| % of women recruited during period      | 31%         | 29%         | 29%         | 30%         | 30%         | 32%         | 35%         | 34%         | 34%         | 32%         | 32%         |

The number of new female recruits grew in volume period-on-period. The number of new male recruits increased by volume when compared to the previous period.

Year-on-year, the number of female recruits decreased by 37 or 6.46%, whilst male recruits decreased by 12 or 1.05%.

Period-on-period, the number of female recruits grew by 60 or 12.63%, and male recruits grew by 128 or 12.87%.

## Broker turnover by state and nationally

| Broker turnover by state | The industry average |
|--------------------------|----------------------|
| NSW and ACT              | 8.6%                 |
| Victoria                 | 6.9%                 |
| Queensland               | 10.2%                |
| West Australia           | 7.1%                 |
| South Australia          | 6.7%                 |
| Tasmania                 | 7.7%                 |
| Northern Territory       | 14.7%                |
| Total nationally         | 8.1%                 |

Note: Turnover accounts for the number of brokers at the start of the six-month period compared to the number at the end of the period, at an aggregator level. Turnover does not exclusively account for the number of brokers joining and leaving the industry. Included in the data are brokers moving from one aggregator to another. For industry comparisons, it is important to note that this is for six months.

Broker turnover results continue to vary across different states, with overall levels at 8.1%.

Nationally, compared to the last period, broker turnover increased by 1.5%.

Year-on-year, the national turnover has decreased by 0.1 percentage points from 8.2% to 8.1%.

## Number and proportion of loan writers per broker business, April 2024 to September 2024

Note: The data in this chart is based on a sample of 15,845 brokers.

Broker offices made up of sole operators continue to dominate the broker landscape, comprising 42% this period. This represents a one percentage point growth when compared year-on-year and period-on-period.

**Broker offices made up of sole or dual operators continue to make up a significant proportion of the industry.**

# Lender segments

Compared to the previous quarter, the major banks' market share fell by 1.4 percentage points in the July to September 2024 quarter, dropping below 40%.

Regional banks aligned to the majors decreased their market share by 1.4 percentage points over the previous period from 17.1% to 15.7%.

Lending with other types of lenders grew 2.1% points, international banks grew 1.1 percentage points and the credit unions, building societies and mutuals segment declined 0.6 percentage points.

**The proportion of broker-originated home loans settled with the major banks has slightly reduced from the previous quarter.**

## Change in value of broker-originated home loans settled per lender category, compared to the previous six-month period

Comparing the April 2024 - September 2024 period to the previous six months, the major banks, regional banks owned by majors, independent regional banks, international banks, non-bank lenders, and white label loans all recorded rises in broker-originated home loan settlements.

Other type of lenders recorded a decline of -23.6%, followed by credit unions, building societies and mutuels of -8.5%.

## Value (\$) and market share of broker-originated business to lenders other than the major banks and their affiliates

Note: Due to decimal rounding, the sum of market share percentages presented in the 'Value (\$) and market share of broker-originated business to lenders other than the major banks and their affiliates' graph does not exactly add up to the equivalent sum of percentages in the 'Share of lending settled with each lender segment graph'.

This segment – including credit unions, building societies and mutuals, non-bank lenders, international banks, independent banks, and any other type of lenders – recorded a 2.1 percentage point increase compared to the previous quarter.

## Value (\$) and market share of broker-originated business to non-bank lenders

Following two consecutive quarters of growth in the March 2024 quarter and June 2024 quarter, the non-bank lender segment's market share of broker-originated home loan lending decreased slightly by 0.3 percentage points in the September 2024 quarter to 5.9%.

## Value (\$) and market share of broker-originated business to white label lenders

Note: The data embedded in this chart sums the white label lending for only those aggregators that have offered the product consistently over the past four years. As such, it reflects organic growth in the product category. As is commonly known, other aggregators are beginning to offer white label loans, but their small share has not been counted in this analysis.

The white label lender segment's market share of broker-originated home loan lending increased in the June 2024 quarter and in the September 2024 quarter, from 5.2% to 5.9%.

## Value (\$) and market share of broker-originated business to credit union, building society and mutual lenders

The credit unions, building societies and mutuals segment recorded a decline for four consecutive quarters since the September 2023 quarter, settling \$2.06 billion in broker-originated home loans.

# Commercial broking

## Number of brokers also writing commercial loans

Note: Commercial brokers as those mortgage brokers who had written a commercial loan through their aggregator's panel for the period. Mortgage brokers who solely wrote loans direct with lenders are not included.

Note: The term 'broker' in this graph refers to the total number of brokers, including both active and inactive brokers.

Year-on-year, the number of mortgage brokers also writing commercial loans increased 24.21% in the April 2024 – September 2024 period to 7,023 brokers. When compared to the previous period, there was a 3.97% rise.

## Number of mortgage brokers writing commercial loans, by state

Note: Commercial brokers as those mortgage brokers who had written a commercial loan through their aggregator's panel for the period. Mortgage brokers who solely wrote loans direct with lenders are not included.

Due to the scale of the Y-axis labels, graph excludes data for Tasmania and Northern Territory.

All states experienced a period-on-period growth in the number of mortgage brokers also writing commercial loans.

South Australia recorded the largest proportional increase of 13.64%, followed by Western Australia and Queensland with 8.35% and 7.07%, respectively.

## Value of commercial lending settled by mortgage brokers (\$)

Note: Commercial brokers as those mortgage brokers who had written a commercial loan through their aggregator's panel for the period. Mortgage brokers who solely wrote loans direct with lenders are not included.

For the April 2024 – September 2024 period, the value of commercial loans settled by mortgage brokers recorded its new highest value. At \$22.68 billion, this result was up \$5.39 billion, or 31.20%, compared to year-on-year.

Period-on-period, the value of commercial loans settled by mortgage brokers grew by \$2.37 billion, or 11.72%.

## Value of commercial lending settled by mortgage brokers, per state (\$)

Note: Commercial brokers as those mortgage brokers who had written a commercial loan through their aggregator's panel for the period. Mortgage brokers who solely wrote loans direct with lenders are not included.

Note: This data does not include Tasmania and the Northern Territory.

The value of commercial lending recorded growth across all states compared to the previous period.

Victoria recorded the largest increase in the value of commercial lending settled by mortgage brokers, reaching its highest ever value at \$6.41 billion, an increase of \$0.87 billion, or 15.74%, from the previous period.

New South Wales and ACT increased by \$0.65 billion, or 9%. Western Australia recorded growth of \$0.71 billion, or 3.41%, South Australian and Queensland were up 18.09% and 13.58%, respectively.

## Total commercial lending loan book value of mortgage brokers (\$)

Note: Commercial brokers as those mortgage brokers who had written a commercial loan through their aggregator's panel for the period. Mortgage brokers who solely wrote loans direct with lenders are not included.

The total book value of commercial lending for mortgage brokers continues to grow, reaching a record high of \$85.89 billion in the April 2024 – September 2024 period.

Period-on-period, the commercial book value increased by \$1.97 billion or 2.36%.

## Commercial lending loan book value of mortgage brokers, by state (\$)

Note: Commercial brokers as those mortgage brokers who had written a commercial loan through their aggregator's panel for the period. Mortgage brokers who solely wrote loans direct with lenders are not included.

Note: This data does not include Tasmania and the Northern Territory.

For the six-month period April 2024 – September 2024, the total commercial loan book increased across all states except Queensland and Western Australia. New South Wales and ACT's book value reached a new high of \$30.65 billion, an increase of \$1.31 billion, or 4.49%, compared to the previous period.

Victoria recorded an increase of \$0.92 billion, or 3.52% growth, to record a total book of \$26.99 billion. Queensland had a decline of \$0.46 billion, or -2.79%, to \$16.12 billion.

Western Australia declined by \$0.21 billion, or -2.63%, while South Australia's commercial loan book grew \$0.52 billion, or 14.62% over the period.

# About the MFAA's Industry Intelligence Service (IIS) Report

The MFAA's Industry Intelligence Service (IIS) Report provides reliable, accurate and timely market intelligence for the Australian mortgage broking sector.

It is designed, produced, and delivered by comparator, a CoreLogic business and a recognised provider of performance benchmarking, market diagnostics and ad-hoc investigative services to the retail financial services sector in Australia and New Zealand.

The IIS Report profiles quantitative variables including:

- broker resourcing,
- deployment,
- recruitment and retention,
- new business acquisition, and
- loan portfolios.

It provides performance metrics or benchmarks for industry and for the prevailing models of wholesale aggregators and franchised broker models.

Individual results for participating aggregators are completely confidential and are never provided to the MFAA, nor to other aggregators or brokers.

The MFAA's IIS Report is produced twice a year, for the six months ending March 31 and the six months ending September 30.
